Professional Summary

A dedicated web developer, I embody passion, reliability, and innovation. My commitment to delivering exceptional code, exceeding project goals, and promoting teamwork fuels mutual growth and remarkable achievements in the dynamic world of web development.

Skills

Technical Skills : HTML, CSS, JavaScript, Tailwind CSS, Responsive Design, JSON & REST APIs, OOJs, MERN Stack, Databases, NPM (Node Package Manager), Python Programming.

Soft Skills : Problem Solving, Team Management, Time Management

Project Work

B.E. Project : Real Estate Recommendation System (Machine Learning Based)

August 2023 – April 2024

Our real estate recommendation system utilizes machine learning to analyze market trends and user preferences, providing personalized property suggestions. It leverages algorithms for accuracy, enhancing user experience and decision-making efficiency.

Employee Management System (MERN Stack Based)

Aug 2024

Developed an Employee Management System using the MERN Stack (MongoDB, Express.js, React, Node.js) to streamline HR processes, featuring real-time updates, efficient data management, and a user-friendly interface.

Education

St. Francis Institute of Technology, Borivali
B.E in Electronics & Telecommunication | (C.G.P.A – 7.5)

Aug 2020 – May 2024

J.H. Poddar Junior College of Science & Commerce, Bhayandar
XII Science | (72.6%)

Aug 2018 – May 2020

Internship and Certifications

- **INTRAINZ INTERNSHIP** – (Web Developer) July 2023 – Sep 2023
Interned as a Web Developer at InTrainz: Contributed to web development projects by building and optimizing user interfaces, implementing features, and collaborating with the team to enhance overall functionality and performance.
- **JP MORGAN CHASE & Co. Job Simulation Certificate** Aug 2024
I also had the opportunity to use JPMorgan's own open source library, Perspective, to build a live graph that displays a data feed for traders to monitor.
- **SIMPLILEARN** – Introduction to MERN Stack Aug 2024
Acquired foundational knowledge in MongoDB, Express.js, React, and Node.js, with practical skills in building full-stack web applications and implementing modern development practices.
- **UDEMY – AWS & React.js** Aug 2023
Gained expertise in cloud computing with AWS and advanced skills in React.js focusing on developing scalable web applications and managing cloud infrastructure.
